Presents

SATURDAY, OCTOBER 28, 2006
9:00 am to 3:00 pm

Aztec Solar
11370 Trade Center Drive, Ste. 3
Rancho Cordova, CA 95742
916-853-2700 office

“It Never Rains in California...”
Seminar & Tour

The Solar Energy field continues to evolve with changes in technology and incentives provided by the state and federal governments.

Come find out what is new in the industry. The staff from Aztec Solar will:

- * Give an overview of different types of solar energy products. What is new in hot water systems, Photovoltaic systems (solar electric), and pool systems.
- * Discuss design considerations for installation and other products needed to complete the installations.
- * Talk about the general sizing requirements for different technologies, different sizes of homes and the general costs associated to these.
- * Tell you about all the rebates, tax credits, and incentive programs that exist in California.

After lunch we will see some of these products in action during a tour of homes in the local area that have solar energy installations.

**Earn 6 Continuing Education Units &
enjoy a beautiful fall day in the Sacramento area.**
